Presentation of the Atmosphere!

What: Create a presentation for teaching the Atmosphere. Your audience are your fellow students. (Not Me, I know this already!)

How: Using the model made in your text book on page 33, the web pages we have visited, magazines we have read and the models we designed in our note book, create a presentation on the atmosphere. You can accomplish this in a number of ways, but here are is a list of ideas:

- Power point presentation
- Detailed Poster
- Prezi Presentation
- Virtual Storybook
- Other

Requirements: You must include the following:

- Title
- % of gases
- 6 main layers
- Explanation of layers or information about the layers including measurement of start and end heights
- Coloring/highlighting
- Pictures and details
- A key
- Your Name

Due Date: ______________________________________
